

Exhibitors started to take their places at BUMATECH, the meeting address of the machinery industry

Bursa Machine Technologies Fairs (BUMATECH), the intercontinental meeting of the machinery manufacturing sector in Bursa, is preparing to host the machinery sector for the 21st time between November 29 - December 2, 2023.

BUMATECH, which will be held at Tüyap Bursa International Fair and Congress Center, will bring together Metal Processing Technologies, Sheet Metal Processing Technologies and Automation Fairs under one roof.

In the fair, the latest technology innovation products from hydraulic pneumatic and robotic systems to welding cutting machines, 3D printers and scanners, fiber laser optical cutting machines to CNC machines, as well as all kinds of machinery sub-industry equipment and materials will be exhibited.

BUMATECH, the intercontinental meeting address of the machinery manufacturing sector, will be organized by Tüyap Bursa Fuarçılık Inc. and Bursa Chamber of Commerce and Industry (BTSO) in cooperation with the Association of Machine Tools Industrialists and Business Association (TİAD) and Turkish Machine Manufacturers Association (MİB), with the support of KOSGEB and Bursa Metropolitan Municipality between November 29 - December 2, 2023. BUMATECH, which will be held at Tüyap Bursa International Fair and Congress Center, will bring together the international Bursa Metal Processing Technologies, Sheet Metal Processing Technologies and Automation Fairs under one roof.

Important representatives of the sector will take part in the fair

BUMATECH will host more than 40.000 professional visitors in an area of 40 thousand square meters consisting of 7 halls. The fair, which will host important representatives of the machinery manufacturing sector from countries such as Algeria, Netherlands, Tunisia, Serbia, Kosovo, France, Italy, Germany, Morocco, Egypt, Bulgaria, Iraq, Iran, Georgia, Azerbaijan, Russia, Uzbekistan and Kazakhstan, will continue to make significant contributions to Turkey's export balance sheet with new business contacts.

Cooperation opportunities for participating companies

İlhan Ersözlü, Tüyap Fairs Production Inc. General Manager said: "Machinery manufacturing and exports are expected to grow more in the second half of this year compared to the first half. As TÜYAP Fair Organization Group, we aim to contribute to the value-added growth

momentum of the machinery sector by bringing together 3 different fairs under one roof with the BUMATECH brand.

During the fairs, there will be foreign buyer delegation organizations under the coordination of Bursa Chamber of Commerce and Industry, as well as bilateral meetings between the professional buyer delegations brought by the intensive efforts of our foreign offices and the exhibitors. Our work to bring together exhibitors, domestic and foreign buyers continues at full speed. Our fair exhibitors are taking their places one by one."

Increases the sector's competitiveness in the international arena

The exhibition, which has a rich portfolio ranging from hydraulic, pneumatic and robotic systems to welding cutting machines, 3D printers and scanners, fiber laser optical cutting machines, CNC machines, state-of-the-art innovation products and all kinds of machinery sub-industry equipment and materials, plays an important role in the growth of the manufacturing sector. The sector, which strengthens its ambition every day, increases its competitiveness in the international arena thanks to the digital breakthroughs realized with Industry 4.0. The fair is expected to add momentum to this rise by building new bridges of cooperation.

BUMATECH can be visited between 10.00 - 19.00 between November 29 and December 1, and between 10.00 - 18.00 on the last day, Saturday, December 2. Detailed information and fair invitations are available at <https://bursamakinefuari.com>
